## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1, 3-13, 15-17, and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Hendrickson (U.S. 4,256,977).

Regarding claims 1, 10-13, and 22, Hendrickson discloses in figure 6 an integrated circuitry comprising a monolithic semiconductor substrate; a power semiconductor switching device comprising a plurality of field effect transistors, 41 and 42, formed using the monolithic semiconductor substrate and having a plurality of electrical contacts including a plurality of gate contacts, a plurality of source contacts coupled in parallel and a plurality of drain contacts coupled in parallel; and auxiliary circuitry 43 formed using the monolithic semiconductive substrate and configured to couple with at least one of the electrical contacts of the power field effect transistors.

Regarding claims 3, 4, 6, 7, 15-17, and 19, the auxiliary circuitry comprises a gate driver amplifier configured to provide a control signal to the electrical contacts of the field effect transistors comprising the gate contacts.

Regarding claim 5, the gate contacts are coupled in parallel.

Regarding claims 8, 9, 20, and 21, there is protection circuitry, 31 and 33, combined with element 43.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 14, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hendrickson, as applied to claim 1 above.

Hendrickson does not expressly disclose planar field effect transistors and CMOS devices are used in the device. However, it would have been within the level of ordinary skill in the art to use planar field effect transistors.
